OBJECTIVE

Experienced software developer seeking a position with a company that values a high level of technical proficiency, collaboration, and creative problem solving to serve users' needs and provides opportunities for professional growth and continuous learning.

EXPERIENCE

FAST Enterprises

Jul 2017 – Feb 2024

Team Lead | Jul 2023 – Feb 2024 *Minnesota Department of Revenue | General Ledger and Payment Upgrade*

- Lead a team of three developers in the design and implementation of an overhaul of the financials system for the Minnesota Department of Revenue including back end financial processing (revenue accounting and general ledger reporting) and payment processing.
- Organized and lead activities related to research of current business processes, requirements gathering, business process analysis, solution design and development, and testing.
- Assisted in project management endeavors such as developing project timelines, procuring project resources, and communicating project status to the steering committee.

Team Lead | Jul 2022 – Jun 2023

Michigan Secretary of State | Financials Subsystem

- Responsible for a team of four developers including assigning and prioritizing work, designing solutions, and reviewing and enforcing coding standards.
- Served as the primary point of contact with the client to facilitate the communication of issues and gather requirements for new features.

Implementation Consultant | Jul 2017 – Jun 2022

Michigan Secretary of State | CARS Project

- Involved in the full life cycle of defining, developing, testing, deploying, and maintaining software for the Michigan Secretary of State, serving hundreds of end users and millions of customers.
- Collaborated within a team of four developers to design and implement features supporting vehicle titling and registration, personalized plates, driving records, licensing actions using Visual Basic and SQL.
- Problem solved with clients to re-envision business processes supported by modern software and increase efficiency in daily work.

Endeveran Corp

Summer 2016

Software Developer Intern

- Leveraged Heroku cloud services to host and develop an SSH File Transfer Protocol web service that communicated with an external Salesforce application.
- Gained experience using the JDBC API in an Oracle Database application.
